RHINOX
XTREME PERFORMANCE

THE MOST COMPACT DESIGN IN THE INDUSTRY

COMPACT DESIGN

Our manual quick hitch is the lightest spring-type hitch on the market - 5-8 kg lighter than our old design. Its compact, low-profile design boosts digging power, maximises breakout force and gives you greater control.

LIFTING EYE

Every Rhinox manual quick hitch includes a LOLER-rated lifting eye to suit a 12mm D-shackle with a Working Load Limit (W.L.L) of 250kg.

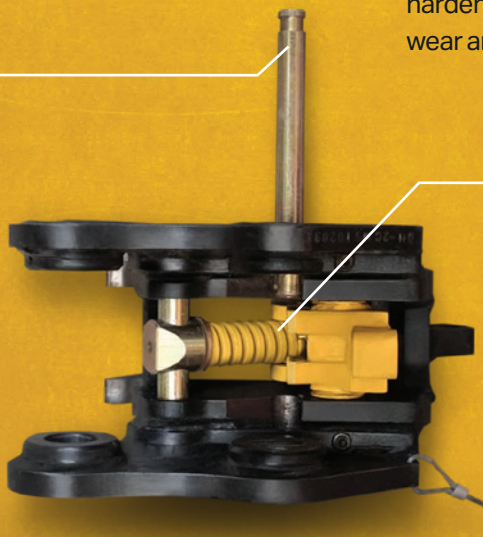

FRONT HOOKS & PICK UP PLATES

The front hooks and pick up plates are made from hardened, wear-resistant HB500 steel to slow wear and help your hitch last as long as possible.

CAPTIVE SAFETY PIN

The Rhinox manual quick hitch uses a captive safety pin that can't be removed or misplaced. If not reinserted, the safety pin protrudes from the side of the quick hitch, making it difficult to miss.

CAPTIVE DIE SPRING

Our quick hitch features a die-type spring that's tougher and longer lasting than a regular coil spring. Secured inside the hitch with an internal rod, it delivers reliable performance without coming loose.
